WAYMORE TOOLS

01

The design process

1: Rendering production: deepen the renderings of the three plans in the sketch.
Including styling style and color matching scheme (proposal to customer in JPG format)

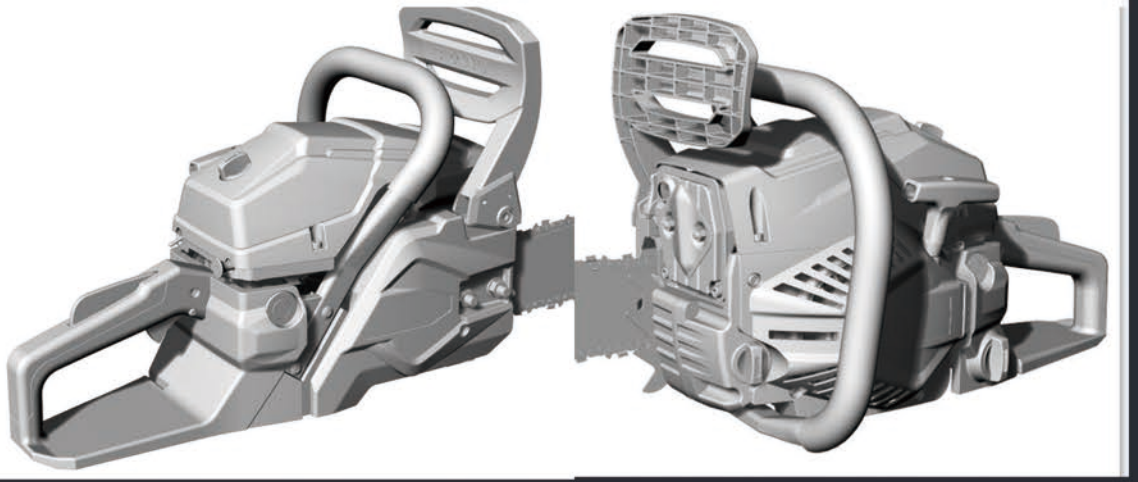
Design Scheme A **Design Scheme B** **Design Scheme C**

Company introduction

01

The design process

2：Create a three-dimensional skin model depend on the selected design plan.



Design Scheme B

Provide skin files in STP format

The design process

3：3D printed hand model production for appearance demonstration.

It can be made at the appearance stage or after the structure is finished.
It can be made by our own factory, or it can be completed by the entrusting party.

WAYMORE TOOLS

WAYMORE TOOLS

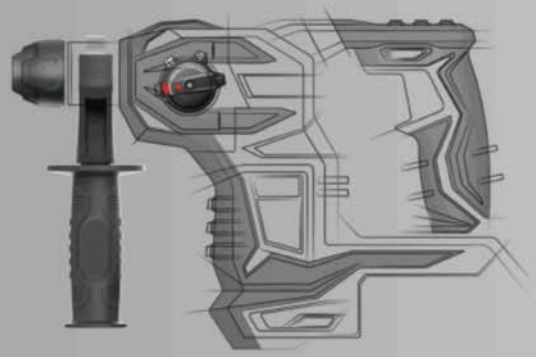
This plan is a new plan designed together with the team designers after the last discussion. The design style is novel and the shape is bold and innovative. It combines current popular elements and traditional mecha style to form an attractive and unique innovative product!



WAYMORE TOOLS

The shape is inspired by crabs. These designs make the brushcutter more integrated. The grille design of the heat dissipation holes and smooth lines make this product more three-dimensional.

WAYMORE TOOLS

Back panel layered design

Integrated design of startup cover and heat dissipation cover

Integrated component design
